SUMMARY

Recent Information Technology graduate with a strong interest in web development. Strong foundation in JavaScript, HTML, and CSS, with experience building personal projects. Eager to apply my technical skills in a professional environment and continue growing as a web developer while contributing to team success.

PROJECTS

Capstone Project: Core2-JJM-Manufacturing Management System

- Developed a manufacturing management system using MongoDB, Express.js, React, and Node.js.
- Built RESTful APIs for order, inventory, and production management.
- Implemented user authentication and role-based access control.

Hr2-Nodado-Hospital Training Management System

- Developed a hospital training management system using MongoDB, Express.js, React, and Node.js.
- Designed and implemented features for managing employee training programs, skill records, training schedules, and progress tracking.
- Built RESTful APIs and integrated frontend and backend components to support efficient data management.
